Two Tragic Deaths Within a Week

One Killed on Railroad and Relief Camp Worker Drowned in Swimming Hole

A worker's funeral was given the young man killed last week on the C. P. R. at Lundbeck. A large number attended the service on Sunday at Bellevue, and black flags were placed on telephone poles along the route of the funeral procession.

The second tragic death within a week in this district occurred on Saturday last when a 25 year old relief camp worker, Walter Frank, was drowned in one of the ponds adjacent to the Frank slide. Reports state that medical examination revealed that his collar-bone was broken, and it is surmised that shock and injury killed him. The funeral was held on Monday afternoon at Bellevue, his parents at Shelo, Sask., advising the authorities to bury him as they could not afford to have the body forwarded home. Rev. A. S. Partington of Coleman conducted the service, which was attended by relief camp workers.

What the School Board Did

At the recent meeting of the school board, taxation rate of 18 mills was decided on, with a discount of 10% for payment on accounts over \$4.00 if paid by August 28.

The secretary was instructed to order 24 new school desks. Orders for supplies of various kinds were placed with H. C. McBurney's drug store, Coleman Hardware Co. and Earl Bowen.

The principal's report was approved on motion of Trustees Reid and Hope.

The board agreed to bear its share of the cost of engaging a teacher in vocal music for the Pass schools. The secretary was granted leave for his annual vacation.

Conflicting Stories

"Soviet Russia Today" a magazine published in Toronto, contains a picture of a communal dining room of a factory in Rostov on Don. Beneath it is read: "Travelers in the Soviet Union seem to find it rather difficult to come across cases of starvation."

Wm. H. Chamberlain, for ten years correspondent to the Christian Science Monitor in Moscow, after removing from Russia, published a series of articles which he imposed under censorship. He stated that four million peasants died in Ukraine for lack of food, having to surrender most of what they raised to the government.

The Toronto-published magazine is a straight propagandist paper.

Mr. R. Ferguson was a Lethbridge visitor for a few days last week.

McBain's Lake Summer Resort

THE most beautiful spot in East Kootenay and an ideal place to spend a vacation that will benefit you in health and give a maximum of pleasure. All-weather highway and close to railroad. For rates on cottages and accommodations, apply to **MRS. C. ROSEN, Manager McBain's Lake Summer Resort** Jaffray P.O., British Columbia.

Boy Scout and Girl Guide Notes

Coleman Troops

The Girl Guides returned on Friday from McBain's lake after spending ten enjoyable days camping. 40 girls under Mrs. R. P. Borden, camp mandant, and Miss Yuill, Guide captain, attended. Mrs. C. J. Devine acted as Quartermaster; Mrs. Jack Devine was camp nurse.

The close of the outing was marked by a fine banquet on Thursday evening. The Blairmore tent was awarded the prize for maintaining the tideliest tent. Several badges were awarded the girls. Miss Yuill was presented with a life savers pin. Mrs. J. Devine made her maiden speech in replying to the toast to the leaders.

Many tests, including swimming, fire fighting, cooking and first class work were passed, and the Guides sincerely thank the leaders, Mrs. Borden, Miss Yuill, Mrs. C. Devine and Mrs. J. Devine for making possible the much appreciated vacation. To those who loaned trucks and cars the leaders and Guides also wish to extend thanks: To Mr. L. Clary, who drove the McGillivray Co. truck, Mr. Chappell, who took the Blairmore truck, Mrs. A. M. Morrison, Mr. Cooke, Mr. Devine, Mr. Westworth, Mr. Creeggan and Mrs. Borden.

The Boy Scouts returned from Waterton Lakes on Tuesday, after ten days very enjoyable camping experiences. Highlights of the stay there were a visit from Commissioner Backman and an inquisitive bear. Windy weather was prevalent, but did not deter the boys from enjoying swimming and hiking. All returned in good health, and wishing that the camp had lasted for a longer period. Scoutmaster Reg. Jones and Mr. Llewellyn were in charge, and save for an occasional infraction of discipline and consequent confinement to the guard tent, and a few extra dish-washing fatigues, everything was O. K.

ST. ALBAN'S CHURCH NOTES

Weddings in St. Alban's Church, Saturday, July 14th, 1934.

Arnold T. Bartram and Annie Brewer of Natal B. C. Witnesses, Mr. and Mrs. Frederick Brewer, brother and sister in law of the bride.

Michael Farnson and Margaret Alice McGladry both of Fernie Witnesses, Mr. and Mrs. Edgar D. Allen, also of Fernie B. C.

Next Sunday—the 8th after Trinity. The services will be, morning prayer and address at 11.15 a. m.

UNITED CHURCH NOTES

Sunday, July 22, the morning service at 11 a. m. will be conducted by Rev. Mr. Upton, of Bellevue, and Mrs. Upton will sing a solo. The evening service at 7 p. m. will be in charge of Mr. J. Shevels of Bellevue, and a cordial invitation is extended to all to attend these services.

Quite a large party of people from town spent Sunday at South Fork, including Mr. and Mrs. A. M. Morrison, Mr. and Mrs. C. J. Devine, Mr. and Mrs. J. A. McLeod, Mr. R. P. Borden, R. F. Barnes, F. G. Creeggan, H. C. McBurney, Chas. W. McKinnon, Bob Pattinson, J. Jenkins, John Atkinson, Vic Lyle and others. Others went out to North Fork, including Albert Short, Sidney Short, Maurice Cooke and Dick Shone.

A FAIR QUESTION

Stirred by growing tendency of his fellow townsmen to use the newspaper for everything but advertising, a South Dakota editor recently asked them pertinently, in a page one box:

"If a member of your family died, would you send out the obituary in a circular letter? If your wife entertained, would you run a slide on the screen of the movie show? If you were to enlarge your store, would you tell folks in a hotel register? If you were to have a wedding at your house, would you tack the news on a telephone post?"

Then why in heck don't you put your advertising in the newspaper, too?

Coleman Baseball Team Wins From Hillcrest 7-6

Pitchers Paul Yagor for Coleman and Buck Tabor for Hillcrest gave a splendid exhibition on Tuesday evening in a Crow league game, receiving good support from the catchers, Sonny Richards for the home team and Makin for the visitors. A few errors in the field allowed a couple of runs on each side to be scored, and the ninth opened with the score tied at 6-6. By a well placed hit in the last half of the ninth, Coleman scored the winning run with one man down, and finished the game 7-6.

Paul Rypien made a spectacular play at first base, catching a red hot hit direct from a Hillcrest batter with one hand and preventing them scoring two runs with men on second and third base.

Line-up:
Hillcrest—Lunn, Ferstay, Tabor, Eliek, Ross, Whiteley, Makin, Haggerty, Thomas.

Coleman—Yagor, Richards, Rypien, Joyce, Kapalka, Gale, Fraser, Emmerson, Kubies.

Coleman will play at Hillcrest on Friday next.

Scottish Musical

Players May Return

The Scottish Musical Players have been booked for a week's engagement in December in the Grand Theatre, Calgary, according to Ernest Desautels, manager for the players. In a letter addressed to The Journal, Mr. Desautels asked if Coleman would be interested in booking them on their next western tour, to which a favorable reply was sent. The most likely plays they will present will be "Bonnie Prince Charlie" and "Lady of the Lake." Many who saw this company have expressed a desire to see them appear here again on their next tour.

IN MEMORIAM

IN LOVING MEMORY of my dear husband, Joseph Fox Bell (Joe) who fell asleep, July 19th, 1932.

To have, to love, and then to part. In the saddest pain of a human heart, There are secret sighs and silent tears, Shed oft for one I loved so dear, Sincere and true in heart and mind, A beautiful memory left behind.

Sadly missed by his loving wife and family, Coleman and Mercal.

Michael Hennessey, who resides at Crows Nest lake, pays an occasional visit to Coleman, making friendly calls and visiting numerous acquaintances. He has caught a few good sized fish lately by trolling in the lake, and passed along a cordial invitation to the editor to "come out and try your luck." Catching a real fish would be quite an event for "ye editor."

Mr and Mrs W. L. Rippon were visitors at Macleod on Sunday.

Rod and Gun Club Competition Prize Winners

The competition held on July 8 at North Fork steel bridge resulted as follows: Matthew Wilson, biggest basket of speckled trout; S. De-Kleyn, biggest speckled and biggest bull trout; George Jenkins, heaviest mixed basket; Mike Krotky, big gill graying. It was a fine day and the members enjoyed the outing.

COLEMAN HOMING SOCIETY

The last old birds' race of the season was held from Broadview Distance 541 miles. Birds liberated at 4:50 a. m. M. S. T. Friday. Arrived Sunday at 11:10:05. The winner of the Dr. Lillie Cup was Joe Vysobid of Bellevue.

Joe Vysobid	378 yds
C. Roughend	200 yds
A. Beigum	196 yds
W. Harrison	186 yds
W. Pryde	185 yds
C. Makin	184 yds
T. Jackson	184 yds
J. Anderson	184 yds
J. Claes	184 yds
A. Eysackers	184 yds
J. Sudworth	183 yds
F. Beddington	183 yds
E. Raymond	183 yds
M. Tarcon	183 yds

Local club prizes were donated by J. Bell, A. M. Morrison, C. W. McKinnon.

The Lillie Cup will be raced for annually and will be governed by the rules and regulations of the Coleman Homing Society.

Well printed and typographically displayed advertisements create a good impression of a business, the same as a good suit of clothes. Advertise in the paper that goes into the homes—The Journal. Ads. in the Journal give prestige to your business, because they create a good impression.

LOCAL AND GENERAL

J. A. McDonald and family are spending a vacation at McBain's Lake, Main beach.

Mrs. Frank H. Graham, Donald and John are spending a few days at McBain's lake.

Miss Peggy Smith of Edmonton, is spending a month here the guest of Miss Belle Flynn.

Mrs. Annie Kulbar is spending a month's holiday at Arrow Lakes, B. C.

J. Hopkins sr. left Monday for Vancouver Island where he will spend his summer's vacation.

Mr. and Mrs. C. Rogers are spending their vacation at Drumheller.

Miss Betty Naylor is home after completing her three years training in the Holy Cross hospital at Calgary.

Mr. and Mrs. Ed. Ledieu and family and Mr. and Mrs. Sherratt and family were campers at North Fork for the week-end.

Billy, Mable and Elsie Ashbridge, of Mercoal, are spending their holidays here with their grandmother, Mrs. Joe Bell.

Mr. and Mrs. George A. Brown and Olive went to McBain's lake on Sunday for part of the summer vacation.

Angelo and Bruno Gentile, Bill Wright, Bill Anderson and John McDonald went to Calgary for the last day of the Stampede.

Mrs. T. Holstead and daughter Audrey returned Sunday after spending two weeks at Spring Point and Calgary.

Dr. and Mrs. Borden and family will spend a vacation at North Fork where they will establish a camp for a month. Mrs. and Mrs. W. Stevenson and daughter of Hillcrest are there.

Footballers Win Close Game Against Bellevue

Easton for Coleman and Spooner for Bellevue, Veteran Play- ers, Pressed Into Service

Coleman gained a close 1-0 decision over Bellevue on Saturday evening on the local ground. Both teams were weakened by loss of several players. Bellevue had the veteran, Spooner on their lineup while Coleman had Alex Easton, a star of other days. Bob Emmerson was given his baptism in senior football and gave a creditable performance.

The first half saw Coleman with a slight edge in play, but showing a weakness around goal. Bellevue played well in mid-field but fell away when within shooting distance of goal.

The second half saw Edwards display some tricky football. The first goal came ten minutes after the resumption when Edwards beat the left back and passed to Jack Anderson who guided it home. A few minutes later Edwards dribbled his way past several men only to shoot wide with only the goalkeeper to beat. Final Result: Coleman 1 Bellevue 0.

Coleman: L. Ford, Easton, J. Anderson, Kapalka, G. Ford, Brown, Emmerson, Fraser, Edwards, Jack Anderson, Farnon.

Bellevue: Stewart, Evans, Lemon, Spooner, Dowson, Alsop, Rhodes, Laughran, Parker, Marconi, Morris.

PLAYERS FOR LETHBRIDGE

Local players competing in the southern Alberta tennis tournament to be held in Lethbridge next week are: Misses Margaret McDonald, Joy Ferguson, May Bell, Mrs. S. Short, G. Jenkins, R. Shone, W. Balloch, C. Roughend. Several other players are yet undecided.

"Fresh from the Gardens"

Economic News In Fashion

Periodically, organizations throughout the country pass resolutions deprecating the treatment of certain news by the public press, but, as a rule, these are ill-advised (however fine the motive behind them) for the simple reason that the press itself is the finest barometer of public opinion. Newspapers could not survive did they not interpret aright the desires of the public to which they cater; they could not exist as profit-making institutions, were it not for the fact they keep a wary finger on the flickering pulse of the public reading public they serve. The success of a daily newspaper depends upon its ability to give the public what it wants. That is why circulation has become the criterion of success in the newspaper field.

The "wants" of the reading public vary from time to time, and policies of the newspapers must vary with them. Hence, news fashions change, as fashions in clothing change; and it is extremely difficult to study the changes as they appear in the columns of the daily press.

A week or two ago, H. R. Knickerbocker, well-known European correspondent of the Hearst organization, arrived in England to write a series of articles for Hearst newspapers on the economic recovery of Great Britain. In the course of an interview, he said:

"One of the most remarkable things that has happened to the American Press since the depression started has been the public demand for economic news. Before 1929, nobody cared much, but when the slump hit America, it produced some peculiar results."

"Economic news now is considered as important as the latest sensational murder story. Whether the readers understand it or not, I don't know, but Americans have acquired a sudden curiosity to know what is happening to the rest of the world. Consequently, newspapers make a regular feature of analyses of world economic news."

Students of newspaper trends had been struck with this popularization of economic news in the States, particularly through the writings of Walter Lippman, perhaps the most famous of all the commentators of economic events. In Canada, during the same period, a similar tendency has been remarked, the manifestations of which, perhaps, have been more abundant for reasons which are not far to seek.

Recent provincial elections in British Columbia and Saskatchewan especially, have demonstrated clearly that the public is more eager to absorb information on economic matters, more desirous of listening to economic discussion from the public platform, than ever before.

This is primarily due to the fact realization of their dependence upon world markets has been brought home to the people of the prairie west with more directness than heretofore. They have become acutely aware of the fact that anything affecting the economic condition of the English textile worker, the French vineyard laborer, the coal-miner of Scotland or Wales, sooner or later, is reflected in their own economic condition. They know now that anything which affects the purchasing power of the German, Austrian, Jap or Chinese wage-earner, must eventually have its reflex here.

World economic news, therefore, has assumed new and more impressive proportions in the eyes of the Canadian people. The vital importance of a healthy world economy has become all too obvious. Consequently, when news turns bullish, when word comes that Britain is shuffling off the coils of long internal depression, the States partake of something more than the evanescent interest of the murder mystery or the serial novel.

New political movements, too, have had their genesis in economic discontent; hence it is only natural that economic discussion should attract an ever widening public. The one drawback to the new fashion lies in the fact that economics, so far, has not been reduced to an exact science, whose truisms can be set forth with the precision of mathematical formulae. For that reason, it is essential that commitment to any specific theory should be followed, not precede, complete conviction. It is not as if it has been advanced throughout economic history. The truth cannot be determined by study of one set of theories, but by analysis of all theories so far advanced from times preceding Adam Smith to those of latter-day Socialists. Such analysis should be made with due regard to practicability, as demonstrated in political history; not in the field of statecraft alone, but in the wider field of trade and commerce, particularly during the last century and a half.

Mosquitoes Hate Yellow

Avoid This Color But Adore Navy Blue And Red

If you would be free from mosquitoes, wear yellow. They simply hate it. If, however, you would like to receive the attentions of the little blighters, just wear navy blue, which they adore. They are keen on dark red, but adore navy blue. Ochre, white and orange are passe and yellow makes them bilious. These findings, states the Canadian National Steamships, have developed from recent studies and the company recommends yellow suits and yellow topees for tropical travel where mosquitoes are liable to abound.

Successful Candidate

Consider the recent campaign in the incommensurate state of Kansas, says the New Yorker. One candidate for the state legislature boasted of 2,000 men are working night and day to have her ready for launching on September 26. The railway is being built through the shaft tunnel at the stern and will be used to carry up the massive propeller shafts to the spot where they are to be fitted.

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. Allow the profuse diarrhea, the vomiting and purging to continue, for a day or two, and you may become weak and prostrated. The reason as you feel any looseness of the bowels go at once to your drugstore and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unnatural action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's." It has been on the market for 85 years.

Rests Whole Hotel

Wealthiest Man In World Paying Visit To England

The richest man in the world is shortly to pay a visit to London. He is not an accidental magnate but a mighty Indian potentate, ruling over a state as large as England. He is His Highness the Nizam of Hyderabad.

This is his first visit to Europe and he will bring over an entourage of 300 people, which includes thirty-five of his wives, who enjoy the title of senior Begums. They will be strictly in purdah, so no white man can look on their faces.

A special liner has been chartered and his envoys in advance are negotiating to take over a whole London luxury hotel.

Nobody knows the extent of the colossal wealth of the Nizam. Fantastic stories are current that the entire vaults of his palace extending for nearly two miles are lined with gold and silver bullion.

He rules over the millions of his subjects with a firm autocratic hand, which has more than once involved the interference of the Viceroy of India. Shortly after war some point in his administration was not satisfactory to the Viceroy and party and a white political official officer was sent along to Hyderabad to "advise and report." This greatly incensed the Nizam.

Then something apparently went wrong on the Indian money market. Huge wads of Indian bearer bonds were being thrown on to the market and minor panics were starting on the stock exchanges of Bombay and Calcutta.

The government tried to buy the bonds but they still continued plunging in. The seller of the bonds was discovered to be the Nizam's broker.

There were hasty consultations between the Viceroy himself and the broker and afterwards with the Nizam. The stock markets ceased being flooded with bearer bonds and His Britannic Majesty's political adviser to the state of Hyderabad was called away to undertake less disturbing duties. That little frolic set the Nizam back about ten million dollars.

His first visit to London is to "render homage" and pay his respects to King George. He will be accorded sovereign honors, such as twenty-one gun salute, a sovereign's escort, guards lining the route from the station to the hotel and one of the King's sons at the station to meet him. In fact, everything will be done on the kingly scale to placate this very important potentate, for he can make himself a bigger nuisance to the "sahibs" than a dozen naked Ghandis.

Rung By Radio Signal

Admiral Byrd Flashed Signal To Liberty Bell July 4

America's foremost historical relic, the liberty bell in Independence Hall, Philadelphia, was rung by a radio signal from Admiral Byrd during the Independence Day broadcast to and from the Antarctic over the WABC-Columbia network, July 4. Special permission to ring the bell was obtained from Mayor J. Hampton Moore of Philadelphia, who spoke during the broadcast. Byrd situated at his lonely advance base 113 miles south of expedition headquarters flashed a signal to Independence Hall, Engineers of WCAU, CBS station in Philadelphia, arranged to "feed" the electrical impulse to a hammer which struck the liberty bell. Its tone was heard not only throughout the United States and Canada, but also in Little America.

Correct English

Should Take Pride In Preservation Of Purity Of Our Language

The person who speaks correctly to-day, or writes what is called "good English," is speaking or writing in the manner of Addison and Pitt and Macaulay and Gladstone and other great masters of the language. It is true new words have been created to meet new wants arising out of our evolutionary progress, and there are many technical terms in common use that Pitt wouldn't have understood. But basically our English is their English, and we should take a decent pride in the fact in the preservation of a magnificent asset and the maintenance of a splendid tradition. Ottawa Journal.

Must Wear Moustache

Budapest is going to have romantic moustache policemen. An order has been issued by the chief of police that all mounted policemen must now wear moustaches. It is considered not only conducive to military appearance and bearing, but in line with the national tradition of the dashing Magyar horseman.

Colonization Finance Corporation

W. C. McKillop, Former Dean Of Manitoba Agricultural College, Appointed Farm Manager

T. O. F. Herzer, General Manager, of the Colonization Finance Corporation of Canada, Limited, has announced the appointment of W. C. McKillop, former Dean of the Manitoba Agricultural College, as farm manager of the Indian Head zone of the Colonization Finance Corporation succeeding O. S. Longman who accepted the appointment of Field Crops Commissioner for the province of Alberta. Mr. McKillop is taking up his new position of farm manager, a wealth of agricultural training and practical knowledge, and experience of many years as superintendent of the Dominion Experimental farm at Brandon, as well as dean of the Agricultural College.

Mr. McKillop was born on August 23rd, 1882, in Glenora County, Ontario, of Scotch parentage, and was raised on the farm of his father who was well known in Eastern Ontario as a pioneer breeder of Leicester sheep and Holstein cattle, and leader in agricultural affairs. Mr. McKillop gained his early education in country school and collegiate institution and attended the Ontario Agricultural College from 1901 to 1905, graduating with the degree B.S.A. (University of Toronto). In June, 1905, he joined the staff of the Dominion Department of Agriculture, as representative of the Seed Branch in Alberta and British Columbia where he introduced seed fairs and seed field competitions in Alberta. He started a seed testing laboratory in Calgary and was instrumental in inaugurating the work of the Canadian Seed Growers' Association in Alberta. In March, 1911, he transferred from the Seed Branch to the Experimental Farms and became superintendent of the Brandon Experimental Farm, his work in this position being very prominent. In 1924 he became the first dean of the Faculty of Agriculture and Home Economics following the inclusion of the Agricultural College in the University of Manitoba.

With the appointment of Mr. McKillop, the Colonization Finance Corporation again has a complete corps of farm managers covering Manitoba and Eastern Saskatchewan, who have under their supervision approximately 1,700 farms totalling approximately 600,000 acres, three-quarters of which are occupied by the owners subject to mortgages or agreement of sale, only 25% being operated by tenants. At the end of the year, 1932, Mr. McKillop, of Galt, Ontario, president of the Colonization Finance Corporation, first president of the Mutual Life Assurance Company of Canada, and president of the Lang Tanning Company of Kitchener, Ontario, is expected to make his second official inspection trip to the west accompanied by a number of directors of the Colonization Finance Corporation who are executors of eastern financial institutions. It is expected that the Corporation will make several important announcements which will be made regarding the expansion and further operation of the Colonization Finance Corporation.

Wager With Death

Two Colorado Convicts In Test To Determine Value Of New Serum

Two Colorado convicts were confident that they had won a wager when they had to take several doses of the new serum to determine the value of a new serum its discoverers hope will prevent tuberculosis.

The convicts, Carl Erickson and Mike Smith, said they have gained weight and are in good health although they have taken several doses of the serum and live tuberculosis bacilli have been injected into their blood.

The life term convicts were told the serum and injections of live bacilli might kill them, but they volunteered to become subjects of experiment after Governor Ed. C. Johnson promised them pardon if they survived.

Russia Imports Wheat

Millions Of Bushels, It Is Claimed, Are Being Sent To Vladivostok

Millions of bushels of wheat, an authoritative source disclosed, are being imported into Vladivostok because of large increase in Russian military manpower in eastern Siberia due to tension between Japan and Russia.

More than 3,000,000 bushels will be imported this year, the source disclosed, almost entirely for the purpose of feeding an increased Russian military establishment.

Despite lack of official statistics from the Soviet Union, it was learned that imports at Vladivostok, once an important Russian port for Russian wheat exports, gradually have been increasing during the past six years.

New Air Service

Direct air passenger express service between Seattle and British Columbia became effective July 1 when United Air Lines opened operation into Vancouver. Extension of the Pacific coast airway will place the Canadian and Mexican borders only 12½ hours apart.

Agricultural Notes

Many Items Of Interest To The Western Farmer

Sudan grass is being grown more extensively this year for pasture purposes in the St. Lawrence counties of Eastern Ontario.

Commercial canning is one of the oldest of the larger organized industries in the Dominion. The first factory was established at Grimsby, Ontario, in 1878.

Seed cleaning operators in British Columbia state that, owing to the general low viability of the timothy seed cleaned this year, much more seed was blown out in cleaning than in previous years, in order to improve the germination.

A saving of thousands of dollars in preparing grasshopper mixtures in Alberta has been effected by the pulverization of the sawdust used, on the recommendations of the Dominion Seed Branch inspectors, thereby resulting in the use of only 20 per cent. of bran instead of 50 per cent. as formerly.

Under the amended regulations of the Dairy Industries Act, a dairy producer grade may refuse to grade any cheese or butter which in his judgment is of either too high a temperature or too low a temperature to permit proper examination, until the temperature of said cheese or butter is brought within a satisfactory range.

The sale of commercial fertilizers in Saskatchewan has been considerably higher than last year, some 1,400 tons of ammonium sulphate and 100 tons of triple superphosphate having been sold. Most of the fertilizer went into the territory east and north of Regina and north of the Saskatchewan-Macklin line. Fertilizer sales in Quebec are estimated at 25 per cent. greater than last year.

Owing to dryness, seed prospects in Quebec, as at May 31, were not promising, especially for timothy and clover. Farmers, however, had planned to increase their seed production considerably, and a circular was sent to prospective growers acquainting them with the services available to them from the inspectors of the Seed Branch of the Dominion Department of Agriculture.

By the discovery of the late Sir Ronald Ross of the relationship between the mosquito and the spread of malaria, eventuating in a similar discovery regarding yellow fever, not only saved millions of human lives but enabled millions of acres of potentially fertile land in tropical and subtropical areas of the world to be placed under economic crops. Previously these lands were death-traps to all who attempted to cultivate them or live upon them.

During the ten months ended May, 1934, the amount of wheat exported from Canada was 138,828,449 bushels. Of this, 95,755,881 bushels went to Empire countries—Irish Free State, New Zealand, Malta, other dependencies, and the United Kingdom, the last named alone taking 93,662,051 bushels. The total amount of wheat exported to foreign countries was 46,062,935 bushels. In the order of the amount imported, these countries were Holland, Belgium, France, Germany, Italy, Japan, Norway, Denmark, Sweden, China, Peru, Bolivia, Brazil, the United States, and other small shipments abroad.

Imports of Canadian barley into the Netherlands reached their peak in 1929 when they totalled 147,772 metric tons or over 41 per cent. of the total. In 1930 the imports fell to 111,881 tons, but in 1931 went up again to 108,630 tons. In 1932 the quantity imported was 77,068, and in 1933 there were no imports of consequence. Since the beginning of 1934 there have been no imports of barley from Canada. Despite its absence from this market for a year and a half, Canadian barley is well liked in Holland and some consumers still ask for it although the price is too high to make business possible, says the Canadian Trade Commissioner in Holland.

Built Fireproof Nest

A pigeon nesting in the courtyard of the federal building at Denver, Colorado, was apparently influenced by ideas of fireproof construction used in the structure. Despite an abundance of twigs and shrubbery it made its nest entirely of wire paper clips. J. M. Le Janitor, who discovered the nest, reported that there were two eggs in it.

Stitched Heart Works

The medical profession, keenly interested, kept touch by telephone as George Hampton, 41, continued to imitate an operation in a Lancaster, Pa., hospital, in which his heart was lifted from its place, stitched to close a stab wound, and replaced.

New X-Ray Device

Possible For Doctors Miles Away To Examine Patient

A new X-ray observation device, resembling life anatomy of the least substantial body organs and even the blood vessels in their natural color, has been perfected and patented by Luther G. Simjian, former director of the photographic department of the Yale Medical School, it has been announced.

Superficially, Mr. Simjian's apparatus not only will show the structure and density of bony opaque parts that appear on present X-ray plates as dim shadowy forms, but lesions existing hazards to the subject being examined. Moreover, by a system of telegraphic wiring between hospitals, it will be possible for a patient to be before an X-ray tube in one clinic while the image of his internal organs is reproduced for specialists in another clinic hundreds of miles away, or in any number of clinics at the same time.

Superficially, Mr. Simjian's invention resembles the familiar X-ray fluorescent screen which reflects the sharp shadow thrown by the subject as he sits between the source of the rays and the screen. In this shadow, dense objects, such as bones, appear almost black, while tissues of less weight fade into lighter tints of gray. Invariably the diagnostician must indulge in guesswork as he strains to distinguish faint lines of shadow.

When the physician desires to peer further into the secrets of a particular organ, such as the heart, he must increase the intensity of the X-rays.

Likes Canadian Way

American Business Man Found Life Tranquil And Enjoyable

A well-to-do American, disliking the way things were going in the United States, sold his business, paid a long visit to Canada and has returned home in a mood to migrate to the Dominion.

He declares that he found life there calm, tranquil, enjoyable.

In Canada he read of no kidnappings.

The people did not grasp their newspapers excitedly every morning, fearful lest the lawmakers had hatched some new and harassing legislative innovation.

The whole atmosphere breathed stability. Few Canadians were affected by the jitter, few talked nervously.—Forbes Magazine.

"Continental Sabbath" refers to the European custom of closing business places on Sunday morning during church hours and then opening them in the afternoon.

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refills — \$1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

Woman C. C. F. Candidate Wins By-Election In North Vancouver Seat

North Vancouver, B.C.—The Co-operative Commonwealth Federation strength in the British Columbia legislature has been restored to seven through the successful defence of the North Vancouver seat in a by-election.

With one small poll of 17 voters missing, Mrs. Dorothy Gretchen Stevens had a majority of 505 over Mackenzie Matheson, Liberal government supporter, and a majority of 314 over all candidates.

The vote was: Mrs. Stevens, 2,789; Mr. Matheson, 2,284; E. E. Leary, United Front, 150, and James Witham, Independent, 41.

The by-election was made necessary by the death of H. C. E. Anderson, C.C.F., who was elected on a minority vote from among seven candidates in November.

Government ministers supported Mr. Matheson on the platform in the closing days and Premier T. D. Pattullo wound up his campaign with an address. He asked for a mandate to take to Ottawa to back up his program of "work and wages" financed upon the national credit.

Mrs. Stevens and her supporters asked endorsement of the C.C.F. platform leading to a socialized state. The election leaves the standing in the legislature unchanged with Liberals holding 35 seats out of 48, the C.C.F. opposition seven, and others six.

British Columbia has two women in its legislature following the election of Mrs. Stevens.

From the opposition benches she will face the Liberal ranks of which Mrs. Paul Smith, Vancouver-Burrard, is a member.

Mrs. Stevens was born in Holland of British parentage. She was educated in Holland and took the degree of law from the University of Leiden.

Since 1919 Mrs. Stevens has been prominent in educational work. In the general provincial elections in November she was a C.C.F. candidate in Vancouver in the three-seat constituency. Three Liberals were elected but the three C.C.F. candidates were directly behind in the field of 15.

"I rejoice for the sake of the C.C.F. movement and for another forward step," Mrs. Stevens said following her election.

Flin Flon Strike Ended

Close To One Thousand Men Back At Work

Flin Flon, Man.—Strike of the 1,300 miners employed by the Hudson Bay Mining and Smelting Company came to its formal end on July 14.

Though hundreds of workers went back on the job at the call of Premier John Bracken of Manitoba, who came here to appeal to the men, scores of others refused to return to work until they met and voted to end the strike. The vote was 201 to 18 in favor of calling off the strike.

Records of the company showed close to 1,000 men at work.

Duke Of Connaught Indisposed

London.—The aged Duke of Connaught, uncle of the king and former governor-general of Canada, was forced to cancel all engagements for the next few days owing to effects of the heat and condition of his throat. Physicians attending the duke, who is 84, said his health was giving him no anxiety but the weather and his throat made it imperative he remain completely quiet for a few days.

Action Taken To Shut Out Australian Wheat And Flour

Ottawa.—The Dominion government has taken action to shut out Australian wheat and flour. British preferential rates on these commodities when imported indirectly into Canada have been withdrawn, and the benefits of the preference have also been removed from raisins, dried currants and butter.

The government's action in respect to wheat and flour was not unexpected. Imports of Australian wheat and flour were the subject of repeated representations in the House of Com-

Opposes Liquor Ads

Premier Hepburn Against Liquor Advertising In Ontario Papers

Toronto.—Opposition to newspaper advertising of liquor was expressed by Premier Mitchell F. Hepburn when asked what course the Ontario government would follow in this regard.

"Personally," said the premier, "I am opposed to liquor advertising in Ontario newspapers and other publications. I want to be fair to the temperance people of this province. To me, it seems an anomaly to try and teach temperance, upon which we all are agreed, and at the same time allow liquor advertising."

Removal of the ban on advertising liquor with the liquor control board of which the lone commissioner, Edmond G. Odette, has expressed himself in favor of advertising on the ground the Ontario press has been "too long penalized" in this regard, but it is accepted no such move would be made without authority of the government.

May Move To Canada

Ten U.S. Factories Likely To Locate In B.C.

Victoria.—Ten firms engaged in wood-work manufacturing in United States Pacific coast states are considering moving to British Columbia on account of labor troubles. It is indicated in inquiries received at the provincial parliament buildings.

Two factories, one in Tacoma, Wash., and one in Portland, Ore., are making immediate arrangements to locate near Vancouver, it is understood.

Movement of these firms to British Columbia would mean employment for some hundreds of men.

Will Not Limit Navy

Russia Is Building Extensively For Defence Of Coastlines

Moscow.—Soviet Russia, lacking an adequate navy to defend its great Arctic, Baltic, Black Sea and Pacific coastlines, is building extensively and has no interest in limiting its navy at this time. The Associated Press is able to state on information from dependable sources that the Soviet union has no intense desire to take part in the naval limitation conference at London next year, unless political problems are to be discussed there.

Wins Wheat Award

Joseph Smith Captures Prizes At Calgary Exhibition

Calgary.—Joseph H. B. Smith, international wheat exhibitor of Wolfe Creek, Alta., captured new awards in the field section of the Calgary exhibition.

In their general division for hard red spring wheat his half-bushel sample was awarded the grand championship and several special prizes.

The grand championship for oats went to J. Rock of Morris, Alta.

Pay Visit To England

Portsmouth, England.—For the first time in more than 20 years German warships visited an English port July 11. The German cruisers Koenigsberg and Leipzig were greeted by a salute of 21 guns fired by shore batteries. They stayed here four days.

End Musicians' Strike

Trouble Affecting Radio Commission Artists Has Been Adjusted

Ottawa.—The walk-out of musicians affiliated with the American Federation of Musicians, affecting the Canadian radio broadcasting commission, ended after a conference between Hector Charlesworth, commission chairman, and Joseph Weber, of New York, president of the federation.

It was announced by Mr. Charlesworth the commission agreed to continue paying union wages to musicians, but declined to operate a closed or unionized organization. This was agreeable to the federation president, who called off the strike a few minutes later through the Canadian unions.

The walkout started in Montreal, June 10, and was extended throughout Canada at midnight, June 15. It affected all musicians affiliated with the American federation who demand higher wages and recognition of the unions. Under the agreement the striking musicians will not be penalized and will be re-absorbed into commission programs as soon as possible.

To The Ends Of The Earth

Radio Signals Flashed From Arctic To Antartice

New York.—The ends of the earth—the Arctic and the Antarctic—were linked through New York by radio. It was said to be the first test of this sort to be accomplished in history.

Radio signals were sent from a remote point in northwestern Alaska, well within the Arctic circle, through New York, to Little America in the Antarctic.

Charles J. V. Murphy, communications officer of Rear Admiral Richard E. Byrd's expedition, told New York of having heard the Arctic signals.

"But they were dim," he reported.

Cattle Reach England

Shipment Of 653 Head Landed In Good Condition

Ottawa.—A cable to the department of agriculture reported the arrival, at Birkenhead, of the S.S. Manchester Citizen with 653 Canadian cattle. The shipment landed in good condition. No sales had been made at the time of cabling.

No decision has yet been reached in the conferences now in progress between Canada and the United Kingdom with regard to the quota on Canadian cattle exported to Great Britain for the remaining six months of the current calendar year. For the first half of 1934 Canada's cattle quota was 23,500 head.

Thieves Were Bold

Three Rivers, Que.—Imagine some bold spirit stealing an automobile right under the noses of 400 police and fire chiefs. J. M. Bureau, legal adviser to the Three Rivers police department, parked his car here while he attended meetings of the Association of Fire and Police Chiefs of the province of Quebec. When he came out the car was gone.

NEW PREMIER

Hon. R. G. Reid, Provincial Treasurer and Minister of Lands and Forests in the Alberta government, who has been chosen to succeed Hon. J. E. Brownlee in the premiership.

Communists Released

Trio Serving Term In Kingston Prison Gain Freedom

Toronto.—Frederated serving little more than half their five-year terms in Kingston penitentiary for being members of the Communist party, ruled an unlawful organization in Canada, John Boychuk, Malcolm Bruce and Tom Hill came back to their homes here.

The trio was released from prison late in the afternoon and came to Toronto by train to receive a noisy welcome and two dozen roses each from members and supporters of the Canadian Labor Defense League. Halls of the Union station re-echoed with their songs, including the International.

Recommendation for their release was passed at Ottawa and followed less than a week the freeing of Sam Carr and Matthew Popovich whose planned welcome was disrupted by police.

May Revise Pension Act

British Columbia Now Has Liability Of Eight Million Dollars

Vancouver.—An overhauling of the structure of the special reserve account under the British Columbia Superannuation Act, by S. H. Pipe, Toronto actuary, has revealed that there exists a liability of \$8,000,000. If superannuation payments are to be continued on the same basis as in the past and without revision of the superannuation set-up, Mr. Pipe is accordingly conferring with provincial and municipal employees, explaining recommendations which are expected to be embodied in a revised act to be presented at the next session of the legislature.

Customs Show Recovery

Ottawa.—Marked recovery was noticeable in the amount of customs duties collected during the first five months of 1934 compared with the same period of 1933, the Dominion bureau of statistics reports. The amount of excise taxes collected on domestic sales also showed a very material increase.

Federal Assistance To Provinces For Relief To Continue For Month

Economy Measures

Hepburn Putting Into Effect Pre-Election Pledges

Toronto.—Working with the assurance of tried political veterans the new Ontario cabinet, headed by the 37-year-old premier, Hon. Mitchell F. Hepburn, began to rule Ontario. Following out their pre-election pledges their first task was to replace the two most important commissions at a salary cost to the province more than 50 per cent less than under the previous administration.

Mr. Hepburn's "big parade" started with high officials of the hydro-electric power commission and the liquor control board leading the movement out of government offices. As for the lesser lights, if any, to follow, the new premier kept his own counsel.

Steps were set in motion to bring the new liquor law providing for the open sale and consumption of beer and wine into operation at an early date.

The new hydro commission is headed by T. Stewart Lyon of Toronto as chairman with a salary of \$10,000, and the other two commissioners are ministers of the crown who will serve without salary. They are Hon. T. B. McQueen, minister of highways, and Hon. Arthur Roebuck, attorney-general.

Edmond G. Odette of Tilbury, the new one-man liquor commission, whose salary will also be \$10,000.

Italian Navy Plans

France Is Annoyed Over Italian Plan To Build New Ships

London.—French negotiators in the Anglo-French naval conversations were represented by persons close to the situation as insisting that France will be unable to participate in the 1935 conference unless the Italian plan to build two new 35,000 ton vessels is limited.

Despite this annoyance over Italian plans, Francois Pietri, French minister of the navy, who is carrying on the conversations here, indicated France is willing to do anything reasonable to meet the demands of Italy. The matter will be discussed by French Foreign Minister Louis Barthelemy when he meets Premier Mussolini next, it was indicated.

Must Employ Veterans

Ottawa.—Successful tenders for government contracts under the \$40,000,000 public works program now being undertaken will be required to obligate themselves to employ a quota of ex-service men on their work, officials of the Dominion command of the Canadian legion announced. Following a conference with Hon. H. A. Stewart, minister of public works, it was decided a clause would be inserted in each contract setting forth this obligation.

Grain Exports Lower

Decrease In Shipments From Vancouver Port This Year

Vancouver.—Grain exports from Vancouver to date now total 46,801,290 bushels as compared with 94,625,830 at this date last year. New Westminster exports are 2,670,166 bushels as compared with 1,017,000 in 1933. The increased movement westward, possibly due to elevators' desire to clean up the old crop in preparation for the coming harvest. Vancouver elevators report 7,926,000 bushels in store, about 10,000,000 below capacity.

Promoted And Retired

Ottawa.—Promotion of Commodore Walter Hose, C.B.E., to the rank of rear-admiral in the Royal Canadian Navy was announced from the department of national defence, July 10. At the same time the announcement was made of the retirement of Rear-Admiral Hose from the service. He was placed on the retired list on July 1, following several years as director of naval services.

Many Government Appointments Are Waiting To Be Filled

Ottawa.—Appointments to positions of high and low degree, running well into the hundreds, are now the gift of the government, some of them requiring immediate action and others not of a pressing nature.

Among the most important positions to be filled are the governorship of the central bank, the chairmanship of the board of railway commissioners, head of the proposed Intermarket Act and the Bank of Canada Act.

The office of deputy minister of marine has long been vacant and will likely be filled before the next general election, if not sooner, and there is to be an appointment of a director of tourist activities to administer the fund of \$100,000 set aside for that purpose in the supplementary estimates.

The 11 senate vacancies are in

THURSDAY, JULY 19, 1934

NOTES AND COMMENTS

PUBLIC OPINION throughout Canada, reflected in a large number of daily and weekly newspapers, is aroused over the action of Justice Ives in setting aside the verdict of the jury in the famous Brownlee seduction trial, whereby he saddled the plaintiff's father with costs instead of entering judgment against the defendant for \$15,000 damages. His action has completely overshadowed the sensation first caused by the revelations of the evidence of Miss McMillan, and as to be expected, an appeal will be made to a higher court to determine if Justice Ives was really taking to himself powers which make a jury of no avail in Canadian courts of justice.

"**THOSE** who live by the sword shall perish by the sword." Chancellor Hitler informs the world that 77 people were executed for complicity in the recent revolt in Germany. Friends of those executed will long harbor feelings of revenge for such summary action, and it is fairly safe to predict that these brutal executions will not go unavenged. In civilized countries people are entitled to fair trial. Germany has gone backward in the eyes of the world. South American republics were often regarded as places where your head was liable to be cut off if you disagreed with the Government, but Hitler has put them in the shade.

LESS than an hour after last week's issue of The Journal had been delivered to the post-office, the voice of Contractor D'Appolonia called over the phone with a complaint. The Journal's reference to some advertising signs in the interior of the former pool room in the now handsome building might have caused a mis-understanding, he considered, therefore we haste to state that those old signs around which we shaped a few reminiscent remarks have been consigned to oblivion in the renovating process, and will no more look mutely on the myriad activities of this hustling town.

THE Amateur public speaker is very self-conscious at the outset of his career, but with practice he sheds his timidity and launches forth in vigorous manner until he begins to fancy himself as a Gladstone or a Beaconsfield. The best example of impressive oratory and the appeal it made is related of a famous eighteenth century orator. He addressed a crowd of miners, whose faces were begrimed with coal dust at the beginning of the speech, but so strong an emotional appeal was made that their faces were washed and shining by their tears when the speaker finished. When we develop such impressive orators as that in the Crows Nest Pass, even our noisy radical speakers will take second place.

MOTION picture producers will have to supply pictures of a higher type to retain public support. Gangster and sex pictures prove objectionable to many, with the result that in the United States millions of persons are being pledged to boycott theatres exhibiting them. One important newspaper which has a high standing states:

"Hollywood motion picture studios scramble for things to film. The organized church crusade, in which lists of the indecent pictures are being published and millions of persons are being pledged to boycott theatres exhibiting them, halts the producer. Fearing disaster, he consents to swing away from crime and 'sexy' themes, but asks: What else is there? Big discovery awaits the movie producer now forced to look around him—He will find absorbingly interesting stories in the life decent people really live."

MUSIC hath charms to soothe the savage breast. Not for this reason will the school trustees of Pass towns introduce musical education as a part of the regular study course, but in order to instill an appreciation of instrumental and vocal music. To lift oneself above the humdrum rut of mere existence is the constant aim of man. It is a laudable thing that school trustees have decided to engage a teacher in music. It was a wise sage who said: "I care not who makes the nation's laws, if I can make its songs." There is immense emotional power in songs and music.

PATROL Leader Wheatcroft of Blairmore Boy Scouts rescued Clare Bennett from the Old Man River at Blairmore on July 5. Beyond the casual stir it may have occasioned in the day's news, there is deeper significance in the fact that the ideals of the Boy Scout organization were again demonstrated. Repeatedly are recorded worthy acts by Scouts who are enjoined to do a good deed every day. To save a life is a good deed worthy of higher recognition than being merely recorded as an incident in the day's news, and steps should be taken that appropriate recognition may be given.

THE fundamental lesson of business management is by no means fully learned, nor has it been learned by all those who should know and apply it. But it is being learned. It is the lesson that the successful exercise of business management depends on a knowledge and conviction of the workability of Christian precepts in the shop, in the office, in the market place.—Christian Science Monitor.

Regularity!

TO MERCHANDISERS:--

☐

"You sweep out, you trim the windows, you dust off the counters, you make up new price cards, you unpack and arrange new stock, you plan your merchandise showing, you do these and a hundred other necessary jobs **Regularly** in the normal conduct of your business.

"But how about the biggest job of all—contacting the people and telling them repeatedly that you are in business and have the goods they need. Do you do that **Regularly**? Do you figure you are going to get your share of the available business if you don't tell folks about your merchandise of your service at **Regular** intervals instead of doing the job spasmodically or not at all?

"By all known tests, experience and thousands of records, the acknowledged best-of-all medium for **Regularity** is advertising in the local newspaper. A newspaper going **Regularly** into the homes of your possible customers, not only in your town but the surrounding territory as well, makes it easy enough for anyone to see how your local newspaper offers you the finest kind of a vehicle for carrying your business message **Regularly** to the people.

"And don't think these folks won't miss your **Regularity** of advertising. They look for their newspaper **Regularly**, Read it **Regularly**, study its advertising (yours, if it's there) **Regularly**.

"And what's more, you'll find they are buying **fairly Regularly**, too, if you'll just check up, especially with the advertisers who do use space **Regularly**.

"**YOURS FOR MORE REGULARITY IN ADVERTISING.**"

Weddings

GRAHAM—HAMAN

The home of Mr. and Mrs. Chas. Graham, Lacombe Alta., was the scene of a delightful wedding on Monday, July 9 at 5 p. m. when Miss Mary Haman, daughter of Mrs. Frank Salvo, of Natal B. C., and Mr. Geo. H. Graham, youngest son of Mr. F. G. Graham of Coleman, were united in holy matrimony.

The petite twin daughters of Mr. and Mrs. Chas. Graham, dressed in pale green organdy and carrying pink and mauve sweet peas, attended the bride as flower girls and led the bridal party down the staircase and into the flower filled drawing room to the strains of Lohengrin's Wedding March played by Mr. S. Machin. The bride followed on the arm of Mr. Chas. Graham, who also attended his brother as groomsmen. She looked exquisite in a gown of palest pink silk organdy, the long princess lines of which broke at the knees into a swirl of ruffles reaching to the floor; the sleeves and neck of the matching jacket showed the same ruffled effect and with this costume she wore a white corded silk turban with veil, long white kid gloves and white kid shoes. Her flowers were a sheaf of lovely pink roses and mauve sweet peas. She was attended by Mrs. S. Machin, sister of the groom, who was most attractively attired in a gown of coral georgette and net made on princess lines and worn with a large white picture hat, white lace mittens, and white kid shoes. She carried a sheaf of pink carnations and sweet peas. The Rev. A. D. Currie, rector of the Anglican church in Crossfield and a friend of the Graham family in Coleman, conducted the ceremony in the presence of the immediate relatives of the groom.

The groom's gift to the matron of honor was an ensemble of white jewellery, to the flower girls gold necklets, and to the bestman a sterling silver cigarette lighter.

A delicious wedding supper was then served by the hostess, the table being daintily decorated with carnations and centred by a handsome three tiered wedding cake.

During the evening the party motored to Sylvan lake, the bride travelling in a smart black satin suit worn with white accessories.

PRICE—CARTWRIGHT

The wedding of Jack Price, youngest son of Mrs. J. A. Price, of Coleman, and Alberta, daughter of Mr. and Mrs. Charles E. Cartwright of Blairmore, took place on Saturday at Hillcrest, the Rev. John Wood officiating. Earl Price and Miss Margaret Price were witnesses. The young couple have taken up residence on Second street immediately east of the Bank of Commerce building.

The bride was employed for some time in the government telephone exchange at Blairmore, while the bridegroom has lived here most of his life, and is employed at the McGillivray mine.

"No Shooting"

Seeing what at first appeared to read "No Shooting" on a sign in Albert Sapeta's bowling alley, closer inspection revealed it to be "No Shouting," so our fears that there were two-gun men around were allayed. Reminded us of a young printer who kept on travelling west, picking up the odd job on his way, and eventually he reached the last outpost of civilisation in the western States. Roaming into a saloon about 7 o'clock in the morning, he stood on the threshold and watched the fellow cleaning up the wreckage of the previous evening. After recovering from his surprise, he remarked: "I didn't know grapes grew around these parts."

"What?" said the cleaner-up, "Grapes? Them ain't grapes; them's eyes. There was one hell of a fight 'round here last night."

The Journal office can fill your orders for commercial stationery

Blairmore Enterprise:—Advertising in any fly sheet carries absolutely no guarantee, while the local newspaper can and will guarantee 100 per cent of its circulation. Too many local district merchants are being made believe otherwise today. The local newspaper is here for a purpose—not so much to beg for advertising patronage as to guarantee that the district is being covered by all the worthwhile news available—therefore we do not beg. Our space as a commodity is here for the purchaser, just as much as is any commodity in a local general store; and in this connection we have done so and always will advocate patronage of a local store that appreciates the advantages and importance of local support. Our subscription lists represent 100 per cent circulation, and our lists are open to inspection and any contradiction.

The Journal is taken home and read by every member of the family. You do not see copies of the local paper lying around post-office floors or other places such as you notice throw-away sheets and other forms of advertising which do not make a forceful appeal.

WORLD HAPPENINGS BRIEFLY TOLD

Steel experts in Germany claim to have developed an alloy nearly as hard as diamonds for cutting tools.

To cope with a potato shortage the reich government has lifted import quota restrictions on potatoes from Holland, Belgium and Italy.

Sir Hubert Wilkins, British explorer, left Croydon by aeroplane for Singapore to join the Lincoln Ellsworth Antarctic expedition.

A new museum of antiquities has been opened at the ruins of Corinth, where relics found in 40 years of excavation.

In the first four months of 1934 building plans in Johannesburg exceeded the total value of plans for the whole of 1933 by \$600,000.

The Prince of Wales received 360 war pilgrims from South Africa in the grounds of St. James' palace, the party being from a pilgrimage to the battlefields of France and Flanders.

A collection of 360 letters belonging to Napoleon Bonaparte, which were apparently abandoned when Napoleon fled from Moscow in 1812, were reported found in a box in a corner of the Kremlin.

Helen Boucher, French air woman, set a new world speed record for light planes weighing 13,500 pounds by covering a 1,000-kilometre course at an average speed of 254 kilometres per hour.

Marked recovery was noticeable in the amount of customs duties collected during the first five months of 1934 compared with the same period of 1933, the Dominion bureau of statistics reports.

Hon. G. Howard Ferguson, Canadian high commissioner to the United Kingdom, told a London audience the world looked more than ever toward Britain for leadership. Mr. Ferguson was speaking at the opening of an exhibition of Canadian products.

Has Ingenious Idea

Man in English Announces Use For Old Razor Blades

There is one man at least who has solved the question that torments hundreds of families—what to do with used razor blades.

Moreover, he is prepared to take other people's old razor blades and use them for the general good! He is Mr. M. J. Harvey, borough surveyor at Hythe, England.

Mr. Harvey has hit on the ingenious idea of using safety razor blades to keep down the weeds in the Royal Military canal.

An official of Mr. Harvey's department said that scores of them are strung on end to a long wire, which is weighted with lead.

A workman on each side of the canal then drags the contraption through the water—and good-by, weeds! The device has been found so effective that there is hardly a weed in the canal and the old method of cutting them from a barge has been dispensed with.

Library Is Popular

People in English Cotton Town Are Great Readers

Great Harwood, the cotton town near Blackburn, England, claims the distinction of being the best read town in the country.

Of its 12,787 inhabitants, more than 6,000 are registered readers of the local branch of the county library.

Membership has increased weekly since the library was opened about three years ago, and so great is the demand on its services that the question has arisen whether to increase the premises.

It is common to see a queue of borrowers waiting outside the library doors.

It is only a small wooden building and people have to take their turns in selecting the books they want.

During the last twelve months 100,000 books were issued.

In two years, records of Oregon state penitentiary show that out of 987 new prisoners 44 were college graduates, 263 had high school educations, 613 had common school educations, and only 23 were illiterate.

The estimated consumption of creamy butter in Canada for April 1934 was 15,742,476 pounds, showing an increase of 668,236 pounds, or 4.30 per cent, on April 1933.

Numbers of ducks and chickens were reported to have died last year in two localities in Middlesex county, Ontario, as a result of eating rose chafers.

A "Railroad Zeppelin"

Shows Speed On Trial Run From Berlin To Cologne

A record railroad run of 380 miles in four hours nineteen minutes—giving an average of more than 90 m.p.h. over the whole distance, including two stops—was achieved by a Diesel-engined "railroad Zep" on a trial run from Berlin to Cologne.

A maximum speed of more than 110 m.p.h. was attained.

It is intended next year to open a regular service between Berlin and Cologne, the schedule for the distance being four hours, as compared with seven hours taken by the fastest steam train.

A "railroad Zep" service to Hamburg has been in operation some months, the time for the 195-mile journey being two hours twenty minutes.

Boat Driven By Car

Idea Being Tried Out On Thames In England

A strange craft was seen undergoing trials on the Thames recently at Putney, England. It consisted of a large, flat-bottomed punt containing a four-seater motor car with a 12 h.p. engine, from which the punt derives its motive power.

Paddles are fixed to the rear wheels of the car, which are jacked up off the bottom of the punt, and these wheels, set revolving with the running of the car engine, cause the paddles to cleave the water. The motorist has only to drive his car on to the punt and couple up.

Religion And Science

Sir Charles Saunders Says One Is Complementary To The Other

The dispute between religion and science is "humbug" in the opinion of Sir Charles Saunders, former Dominion cerealist and discoverer of several varieties of wheat, including Marquis.

In his first address since he was knighted in the King's birthday honours list, Sir Charles at Toronto told the Loyal Knights of Ye Round Table, of which he is honorary knight: "There cannot be any conflict between religion and science. Religion theorizes about the deity and science studies his works."

Provided each keeps to its own work, they are complementary and supplementary to each other."

He added: "All this dispute between the church and science is humbug. There is no need for it unless the church says something it has no business to say, as in the case of Darwin, or science says something about God who has not yet been a subject for study by science."

Sir Charles was speaking before the annual dinner of the Knights.

To Increase Vision

Optical Device May Be Great Aid To The Near Blind

Announcement of what he termed the "microscope spectacle", an optical device to increase visual acuity by 250 per cent, and employing a "new principle" in optical science, magnifying the vision of the partially blind beyond that of any other known device, was made at Toronto by Dr. William Feinbloom, of New York, before the international congress of the American Optometric Association.

Dr. Feinbloom said he had been working for nine years on the problem of achieving "this maximum magnification of vision for the near blind in a convenient form that could be worn like ordinary spectacles."

Public streets take up one-third of the area of Manhattan Island.

Recipes For This Week

(By Betty Barclay)

TURNIPS AND CARROTS

1 cup cold boiled carrots
1 cup cold boiled turnips
1 cup medium white sauce
1 teaspoon sugar
1 teaspoon lemon juice
Salt and pepper
Buttered toast

Cut the vegetables in cubes. Add the white sauce, sugar, and lemon juice. Season with salt and pepper. When thoroughly heated, serve on toast, garnished with parsley.

UNBAKED BROWNIES

2 squares unsweetened chocolate
1½ cups (one can) sweetened condensed milk
2 cups (½ pound) vanilla wafer crumbs

1 cup finely chopped walnut meats
Melt the chocolate in a double boiler. Add the sweetened condensed milk, stirring over boiling water five minutes until the mixture thickens. Add vanilla wafer crumbs and ½ cup finely-chopped nut meats. Butter a shallow pan and sprinkle with ¼ cup nut meats. Place chocolate mixture in pan and spread evenly using a knife dipped in hot water. Sprinkle the top with the remaining ¼ cup chopped nuts. Place in refrigerator several hours or overnight. To serve, cut in squares, Makes 18. (Graham crackers may be used in place of vanilla wafers).

Was Too Prominent

The resident secretary in a provincial town of one of the big insurance companies was entertaining his general manager one day and suggested a game of golf, which offer was accepted. It so happened that the secretary was in unusually good form and the game ended at the twelfth hole. The manager was rather annoyed at being so heartily beaten, and he inquired acidly as he picked his ball off the green, "Tell me, Mr. Blank, what do you do in addition to golf?"

SUNDAY SCHOOL LESSON

JULY 22

ELIJAH HEARS GOD'S VOICE

Golden text: "Speak, Lord; for Thy servant heareth." I. Samuel 3:9. Lesson: 1. Kings 19:8-21. Devotional reading: Psalm 57:1-5.

Explanations And Comments

Elijah's Lament at Horeb, verses 9, 10. A week ago we left Elijah on his way to Horeb. Now he has reached his destination and we are told about his experiences there. He lodged in a ruined place, the word of the Lord came to him. And just as we learned by means of a vividly told dialogue between Jesus and his disciples that the struggles of mind Jesus passed, so here in the Old Testament by a similar method, a dialogue between God and Elijah, we are given a glimpse of what passed in the depths of the prophet's mind.

"Elijah had been the chief actor in a stirring drama, but away from the footlights he had to find his bearings in a new situation. In retreat from the wrath of Jezebel he was overtaken by such a doubt as vexed the soul of Hamlet. The world is out of joint: O cursed spite that ever I was born to see it right! But, unlike Hamlet, the prophet had a refuge. He found his way to Horeb, that sanctuary of nature curtained by clouds, that temple of Jehovah not made with hands. And there he sought to wrestle with things out in the presence of God and to find a policy in accordance with the divine will. 'What didst thou here?' was the word to Elijah. Did it mean that Elijah had come to Horeb because there Moses had communed with God, and he should have known that he could meet God anywhere?"

"The Cure of Despondency," verses 15-18. God recommissioned Elijah. The post he had thought to lay down still awaited him. He must leave the refuge of the cave and get to work. He was not at the end of life; there was more for him to do. There were new leaders to be found and anointed for the work. On the way to Damascus there was Hazael (now a general of Benhadad) to be anointed king over Syria, and Jehu (an officer at this time in Ahab's army) to be anointed king over Israel, and Elisha to be anointed prophet to take the place of Elijah himself.

Most of the manners in the automobile world are possessed by gasoline station attendants.

Little Journeys In Science

THE LIVING CELL

(By Gordon H. Guest, M.A.)

To Robert Hooke, an English botanist, goes the credit for the discovery of the cell. It was about the middle of the seventeenth century that this scientist, while examining a piece of cork under the newly discovered microscope, observed that it was made up of a number of alveoli to which he gave the name of "cells". Other scientists continued to study these cells but it was not until one hundred and fifty years later that Brown and Dujardin commenced to study the contents of these cells.

These scientists saw them as an agglomeration of very small bags, which were independent of each other and contained a substance which they called "protoplasm". Protoplasm possesses the property of changing the material received from the blood stream, oxygen and food, into living matter. How this change is brought about is still a mystery. All that science knows is that water and bread, for example, contain the same atoms as the deadliest of poisons. Food contains the elements of living matter to grow and increase in number, whereas poisons bring about their destruction.

When examined under the microscope the cells seem to consist of a nucleus suspended in the protoplasm, the latter being a more or less viscous translucent material. The whole cell is held together by a protective membrane which is similar to the protoplasm in nature. In certain organisms, however, we sometimes find that this membrane is missing and that the cells are simply drops of liquid without any protective coating. In these cells are found traces of carbon, oxygen, nitrogen, hydrogen, sulphur, phosphorus, nickel, zinc, arsenic, iodine, even titanium, vanadium and molybdenum—perhaps gold. Because who can say with assurance what elements exactly enter into the construction of a living cell.

Science has discovered very little as yet about the nature of protoplasm, because no sooner does the men of science attempt to analyze it than it ceases to function. Examination of dead protoplasm gives no further clue to the phenomenon called life.

Scientists cannot agree on the number of cells of an adult human being. Some say a billion billions, others estimate it at only sixty billions.

Has Gone Air-Minded

Dawson Creek Building Landing Field For Big Planes

The little village of Dawson Creek, B.C., at the end of steel is building a permanent airport and establishing a landing field to accommodate the largest aeroplanes in keeping with the advance aviation has made in the north country. So air-minded have citizens become they have voted to move the curling rink, tennis court, basketball court and baseball diamond to provide a field large enough for a tri-motored aeroplane to land and take off.

In Canada there are three native species of elm—white, red, and rock. The red and the rock elm are confined to southern Ontario and Quebec. White elm, however, extends from Cape Breton to central Saskatchewan, south of the height of land which divides the Great Lakes from Hudson Bay.

WITH CANOE AND PADDLE ON CANADA'S WATERWAYS

CHANGE is the prime essence of a vacation and a canoe trip in Canada is one method by which the stress of daily life can be exchanged for a transitory carefree existence. It may be for a limited time only but its effects are felt all the year round. Joyous crowds, rumble of traffic, hot pavements and vitiated air have no place in the life of the canoeist.

A large number of interesting routes are outlined in "Canoe Trips in Canada," a booklet recently issued by the National Parks of Canada, Department of the Interior, Ottawa. Following the routes described therein one can drift lazily along or relive the strenuous days of the voyageur. There are cruises which lead down the Ottawa and St. Lawrence rivers and lakes with alternating civilization and lightly wooded country. There are long, smooth flowing rivers and placid lakes on

which one can travel for days, and by contrast rushing streams which ever and again break into foaming rapids and thundering falls. There are adventurous trips through wilderness country along routes once followed by the Indians and fur-traders, now almost forgotten so seldom are they travelled. Striking geological formations, the most beautiful scenery, the charming and the picturesque await the advent of one's canoe on the numerous and varied water trails of Canada.

FALSE TEETH

DeWERNET'S POWDER

Sold the world over—Dr. Wernett's Powder—justly called "the perfect tooth powder." It holds the teeth firm for hours longer. Leaves no sickening gummy paste—teeth feel so snugly yet comfortably they feel like natural ones. Preserved by world's leading dentists—just sprinkle on. Inexpensive—any drugstore.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl," Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their happy lives apart. Peter is able to provide for her, but she is a young, artistic woman, trying to win a competition for a scholarship abroad and Camilla is the spoiled daughter of a wealthy family. She is not to inherit money when she comes of age and so is finding commercial art in the hope of finding an agency job. Others in the story are Avis Werth, another wealthy girl who is true to her mother, Sylvia Todd, Peter's model, and Mrs. Melton, his former mother-in-law with whom he has quarrelled. After a party at an exclusive club, where the rest of the members of the party go on a cruise to confine the party, Peter and Camilla slip off to the beach by themselves and fall in love on the sand. When they awake, it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla goes to Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla goes home, she is called by Mrs. Melton and goes to her. Mrs. Werth calls and persuades Peter to accept a loan of \$1,000. Peter gives his exhibit and Camilla and Camilla for suggestions as to a name for it. Camilla suggests "Rager Youth," and Avis "Inspiration." Peter adopts the latter title and Camilla, heartbroken, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue which has been shattered to pieces. Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters his exhibit under the name of "Inspiration," and she is sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts in addition to the newspaper advertising. Camilla to both write the "Tiny Tots" stories and to deliver them.

(Now Go On With The Story)

CHAPTER LII.

It was arranged that the author of the Tiny Tots and the broadcaster of their escapades would remain anonymous until her radio debut, when she would be introduced to the public by her sponsor, the president of the Wheathearth Cereal corporation. What the interested public did not know was that her identity was not even known to her indirect employer, Alexander Hoyt. The day of meeting this mysterious individual who had so turned the tide of his fortunes, Hoyt was not insistent and readily agreed to wait with his public for an introduction.

In fact, the affair rather pleased his fancy, added a dash of spice to his prosaic routine, which he found somewhat depressing during the past year.

This rejuvenation of his business was like an elixir of life to him; it stimulated his imagination and ambition as they never had been in his experience. Like all things that are precious, he had almost to lose his business, his pride, his ambition, before he discovered how much he valued them. And as the day drew nearer when he would meet and introduce this mythical creator of the Tiny Tots to his fast-growing consuming public, he found his excitement most as excited and expectant as a young man approaching his wedding day.

But before that event took place another important day added its quota of excitement to Camilla's series of startling events.

She had not seen Avis since the

"Blue" Spells

Reduce some women to the pearly shadow of their own smiling selves. Order the Vegetable Compound when they feel that the "blue" is coming on. It steadies quivering nerves... helps to tone up the general health... gives them more pep... more energy.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

W. N. U. 2055

evening of the party at the studio, when the statue was destroyed. They had avoided each other by mutual consent, and neither had discussed the other with Peter, who was seeing both of them regularly.

He had gone to the Werth's to see as Avis had arranged, playing the part of the artistic critic and professional adviser with admirable charm and finesse. He discovered the possibility of no less than three pieces for the gardens, which were spacious and beautifully landscaped. The rose garden needed a fountain figure, the rock garden a droll woodman and the English formal garden presented an idea for a sculptural group of the seasons, done in white marble.

Mrs. Werth was favorably impressed and remarked when he had gone, "So that's the fellow with whom Camilla Hoyt managed a secret marriage? I can begin to understand why. Amelia Hoyt finally approved and accepted him as a charming boy, and I've no doubt he has talent. His quiet modesty is most becoming. Why don't you get interested in someone like that? A girl with your experience could do a lot for such a young man. I could thoroughly approve a son-in-law like that."

"Give me time, mother," Avis shrugged. "Men like Peter are not picked up at every tea dance and golf tournament. They are exclusive and seduced, toiling away in some attic or hovel to give us restaurants. If I flirted with a promising looking waiter, you would be perfectly horrified."

"Don't be ridiculous," her mother admonished. "As for giving you time, do you forget that you are twenty-four and have to give me even the privilege of announcing an engagement?"

"You needn't remind me of it. But the wisdom and experience of three or four extra years may be more profitable in the end than too much youth and beauty."

"You mean Peter Anson and Camilla?" her mother glanced up at ask quickly. Avis exhaled cigarette smoke slowly and swung the foot of a crossed leg, nonchalantly. "Their marriage was not so far from the beginning. They are married already, and never have lived together. I may as well be prepared to console him as anyone. I dare say that he is rather fond of me."

Mrs. Werth struggled with past-generation scruples which swayed precariously to the right, a modern convention. "Well, I can't say that I approve of your generation's way of doing these things, but you know more about your affairs than I do. I still maintain that this Peter is a man worth playing for with discretion. Perhaps this work which he plans to do for us will influence his favor."

"Why else would you suppose that I am so concerned about the garden?" Avis laughed with amusement. "Twenty years ago," her mother attested, "I should have been horrified to think of my daughter deliberately planning to take another woman's husband, even if that woman didn't want him. I'm not wholly converted to the idea yet, but if that is your way of doing things, I don't suppose my presence or anything else can stop you."

"Nothing is going to stop me," Avis declared with fervor, crushing out her cigarette in a tray with a silver stag ornament. She stood up abruptly and straightened the soft mesh folds of a brilliant orange apron suit that displayed her figure to advantage. Always, her clothes emphasized this most attractive feature of her person, whether she were dressed for evening, afternoon, or lounged in diaphane. She wore long, very fitted sleeves or none at all, velvet tailored muffs for sports and street. Small, untrimmed felt hats, or berets at a jaunty angle, covered her sleek dark hair and accentuated her vivid make-up to the advantage of her plain but lovely features, without being beautiful, she was a stunning woman. Having nothing else to occupy her time and thought, she had specialized in herself.

"I wish these next twenty-four hours were past," she observed impatiently. "I should like to know just how to arrange my prime to look depends upon the Paris scholarship award. I really don't hope that Peter will have a chance to win, but it will be a tremendous satisfaction to have it all settled. Tomorrow is the day, and I suppose there is nothing to do except to wait. I feel I'll run out and see Cable to pass the time. I hear that she is seen about with Terry much these days. Wouldn't it be funny if those two, after playing around with everyone both of them know, would settle down together?"

"I think it would be a good thing for both of them," was Mrs. Werth's opinion. "Their experiences balance

very well and their pasts would be no mysteries to each other."

"It sounds too placid to interest me, but Camille hasn't a spark of imagination in her empty little head. All she needs is a man who can deposit the money to cash her checks, and I guess Terry always can do that unless his dad loses his fortune. By the way, mother, I need another thousand to cover some investments I made recently. Will you tell dad to credit me with another four or five thousand?"

To some people, life and extravagance are as simple as that; to others, existence and sustenance are one continual struggle. There are those who give and those who take, and those who live and those who accept it. Avis was one of the latter and always would be. Had she not been secure by her own rights of inheritance, she never would have dared set her heart on Peter Anson.

Rather than battle with the world for a living as Camilla was doing, she would have loved and illusion in the discard, even without a reluctant glance over her shoulder; and pursued a tangible fortune. Being already possessed of one, her idle fancy had settled upon a forbidden love. What she would do with him when she got him, she was not quite sure; but Peter represented to Avis the unattainable, the goal of achievement which every man and woman has in some form or other.

Avis found Camille unusually reticent about Terry. It was customary for her to talk volubly about her current "big moment," but she only observed casually when Avis mentioned her recent friendliness with Terry. "Of course, we're going around together. Why shouldn't we? We've always been, when we had the one else more important on our waiting list. Terry's a good sort, but as lazy as you are."

"—I say?" Avis queried in astonishment. "Why, I'm busy every minute!"

"And how?" Camille laughed. "But what I want to know is how did the Ansons straighten out the tangle? Was it Camilla who broke the statue?"

"Who else could have?" Avis queried with an unadorned statement.

"Well, aren't you a little ash and of yourself for driving her to such desperation over your flirtation with poor Peter?"

"It serves her right. She had no right to ruin his life by dragging him into that absurd marriage, and neither of them deserves a dollar for it. I could make Peter what he wants to be."

"Only by breaking him first—breaking his ideals about love and marriage. And I don't think you would have much left to work on, if you did that to Peter."

"And that from our most noted playwright!" Avis exclaimed in mock surprise. "What has Terry been doing to you, anyway?"

"You'd be surprised!" she retorted. "So, darling, not at anything you did?"

"Avis saw a place to trade a straight left."

Back To Nature

Believes Unemployed Should Leave Cities And Go On The Land

Canadians have been too premature in their attempt to urbanize a big country, still at the beginning of its development. Dr. Rev. Robert J. Renison, D.D., rector of St. Paul's church, Toronto, told reporters as he sailed for England aboard the liner *Avonia*.

The real solution to the hunger of thousands of persons in this country, he believes, is to get back to nature and the soil.

Dr. Renison was born in Ireland and educated in Toronto. For 14 years he was a missionary in the Hudson Bay area. In 1924 he became dean of the cathedral in Vancouver, and later bishop of Athabasca for a one-year period.

Ancient Coal Tong

An iron coal tong, thought to be the one used 200 years ago by David Zieglers, founder of Schoenbrunn—first white village in Ohio, near Cleveland—was found recently by Harry Clevy, pilot at a Schoenbrunn flying field, when workmen were grading the ground.

Always Grumbling

A farmer, who was in the habit of grumbling about things, was told to say that his potatoes were very big that year. "Well," said his neighbor, "I'm glad you are pleased with the size of your potatoes."

"Yes," said the farmer; "but what shall I do without the small ones on the pigs?"

There are five quadrillion tons of air in the world.

THOMAS BRADSHAW

Former Finance Commissioner of Toronto, who has been appointed by the Winnipeg City Council to conduct a survey of the city's financial set-up.

Has Queer Occupation

Man in England Sells Bees' Stings For Rheumatism

Britain's queerest salesman is George Aloysius Storey. He peddles pain.

All spring and summer he wanders through the small villages and hamlets, carrying on his back a large black box which emits a loud buzzing.

The box contains bees, whose main duty is to sting his rheumatic clients. Sixpence a sting is the price charged, and he finds plenty of people willing to offer an arm or leg to a bad-tempered bee.

A reporter found Mr. Storey walking along a road between Swinford and Catterthorpe, in Leicestershire. His dog hummed rhythmically to his stings.

"The faith in bee-stings as a remedy for rheumatism and neuritis is unshaken among most of Britain's villagers," he said. "I have only to arrive in the smallest hamlet to find plenty of customers. I prepare a small place on the victim's arm or leg with antiseptic, and place the bee in a tiny wire cage on the spot. Then I tickle the bee with a straw till it becomes really angry, and stings in self-defence. Naturally, I have to keep renewing my stock of bees."

And I get these from my brother-in-law, who has hives near Durham."

"It serves her right. She had no right to ruin his life by dragging him into that absurd marriage, and neither of them deserves a dollar for it. I could make Peter what he wants to be."

"Only by breaking him first—breaking his ideals about love and marriage. And I don't think you would have much left to work on, if you did that to Peter."

"And that from our most noted playwright!" Avis exclaimed in mock surprise. "What has Terry been doing to you, anyway?"

"You'd be surprised!" she retorted. "So, darling, not at anything you did?"

"Avis saw a place to trade a straight left."

THE RHYMING OPTIMIST

By Aline Michaelis

THREE A.M.

The waning moon from tilted cup Spits nectar, rinsing out the dew. And mocking bird, by that white wine.

Is stirred like wind-tossed bough.

O, wild and strange his poignant notes Which on the night emblem. A spray of liquid silver sound To shine against the dark.

Far moon, so passionless, so cold, How can your rays inspire That longing melody of pain, Such mounting love and fire?

The waning moon looks down from Earth

Whirls heedless, lingers in sleep; But her one worshiper sinks still Across the night, the deep.

Just A Fek Questions

Matter Of Paying War Debts Has Many Angles

Yes, Europe "threw the money, didn't they?" But Americans, before asking Europe to pay up, should ask themselves whether they want Europe to pay. And before that they should ask themselves whether they are allowing their emotions or their good business sense to decide their answer. And before that they should ask themselves whether America needs more money, or whether it needs more work to offer its citizens; whether it needs more goods (payment in kind) or more chances to sell its already abundant goods. And before that they should ask themselves whether a debtor can be expected to buy more goods while he is paying up old debts.—Christian Science Monitor.

Africa Growing Reward Wheat

A few grains of Reward wheat taken some years ago to Southern Rhodesia by Lionel Cripps have developed under Rhodesian conditions into a crop containing a very high protein content. The fame of the new wheat is such that samples are wanted all over Africa, largely because of its rust-resisting quality. Moreover, Southern Rhodesia now is able to grow all her own requirements instead of having to import foreign wheat for mixing.

Canada Benefits By World's Greatest Shipping Merger

Canard White Star Limited Steeped in Romance Of The Sea

With the organization of Canard White Star Limited, the Atlantic passenger fleets of the Canard Line and White Star Lines comprising 25 ships and the steamer of 5,000 tons which will be launched on the Clyde in September, are united under one management. But just as the identity of each line is reserved in the name itself, the traditions of the Lines whose collective experience in the handling of ships covers a period of 158 years will carry on.

This unique experience gained in the romantic days of sailing ships, broadened by the less romantic but more practical development of steel ship and steam engine, has reached its culmination in the gradual but wonderful evolution of the huge, magnificent luxury liners carrying the home flags of the Canard and White Star Lines to-day.

Who has heard the names of the Mauretania, the Berengaria, the Aquitania mentioned and said to place them among the "immortals" of the Canard Line founded in 1840 by Samuel Canard of Halifax and dedicated to the service of humanity?

For so long have the ports of the world succumbed to the Canard and White Star ships; for so many millions of travelers have they provided a "wedded state of life" as it were, to be wondered at that these ships bear names to conjure with, and that their service has become a tradition for all that is best and most worthy.

The history of Canada is inseparably woven with the history of Canard. It was due to the vision and courage of a Canadian, Samuel Canard, that a regular mail and passenger service was made possible between Great Britain and Canada.

And that steamships supplanted sail on the North Atlantic. It was his driving force and genius that built the Canard Line and sent her off from Liverpool on July 4th, 1840, bound for Halifax with the first Canadian mail.

Her Majesty's Royal Mail, and he guaranteed that thereafter mails and passengers would be carried by the Canard Line. Under the steamships of his line, that this first epic voyage was completely successful, due to Samuel Canard's organizing genius, for the tiny paddle-wheeler Britannia of but 120 tons, which made the voyage in thirteen and one-half days, after 191 ninety-four years later, there is being built for the Canard White Star Line the largest and most magnificent ship in history. No. 534 of 75,000 tons and more than 1,000 feet long, the dream ship that Samuel Canard could never have imagined.

Trade has followed the home flags of Canard and White Star, and Canadian wheat producers, farmers and stock raisers have found for their products a solid place in the markets of the world, added in their quest by the facilities provided so continuously, reliably and regularly by these companies.

The growth of Canada and the increasing affluence of her people have been met by the continuously improving service by both Canard and White Star. Always pioneers, the ships built by these companies have provided the greatest possible degree of luxurious comfort, beauty, seaworthiness and steadiness, and as heretofore, Canard White Star Line will continue to frequent and regular sailings to England, Scotland, Ireland and Continental ports.

Canadians are fortunate in possessing the most beautiful seaway to Europe. The magnificent river journey from Montreal to the sea, which shortens the actual ocean voyage by days, has been a feature of Canard and White Star's ability for many years and has done a tremendous service for Canada in making the greatest wealth and beauty of this Dominion known to the world.

Canada's destiny as a great nation is evident, and the record of these companies would indicate that Canard and White Star Limited will march forward with it, providing for Canadians transportation system that will meet every travel whim or need, and one that is worthy of the complete confidence which it enjoys to-day.

Proved His Identity

Dog Lost For Five Years Does Trick For Master

The saying that "elephants never forget" seems as far as possible to dogs at least as far as "Prince," collie dog owned by a man in Quincy, Mass., is concerned.

"Prince" disappeared from home five years ago. He returned the other day to the usually home scratched on the door for admittance, and just to prove his identity beyond a doubt, performed a series of tricks which his master had taught him when a puppy.

A Sticky Story

Here's a sticky story from Liverpool: A 40-gallon barrel of treacle burst and flooded the roadway. Five lorries struck fast. Cyclists pedaled furiously and made no headway. Three pedestrians struggled onward leaving their shoes behind them, and an office-boy fell headlong. Crows cheered as he staggered from his treacle bath.

Little Helps For This Week

"It is good for me that I have been afflicted, that I might learn Thy statutes." Psalm 119:71.

And yet these days of dreariness are sent us from above. They do not come in anger. But in faithfulness and love; They come to teach us lessons Which bright eyes could not yield. And to leave us blest and thankful. When their purpose is fulfilled.

Why should I rebel at the plough of my Lord that maketh deep furrows on my soul. I know He is no idle husbandman. He prepareth a crop.—S. Rutherford.

Heed not distressing thoughts when they rise ever so strongly, even though they have entered your mind far them not, but be still awhile and do not believe the power you feel they have over you, and they will fall all of a sudden. It is good for your spirit, and greatly to your advantage, to be much and variously exercised by the Lord. You do not know what He has already done, and what He is yet doing for you therein.—I. Pennington.

Tesla Tells Of Force Rays

Can Be Set Like A Wall Around A Nation's Borders

Nikola Tesla, the inventor, celebrating his 78th birthday anniversary, declared he has discovered force rays which can be set like a wall around a nation's borders to render it impenetrable to military attack.

He said he plans to place his inventions at the disposal of the Geneva conference in the interests of peace.

The new rays, he said, would be made of particles, probably dust of some sort, microscopically fine, driven electrically and projected in the form of vast curtains miles high and 100 miles each in length. The particles would travel with unheard-of velocities of 50,000,000 volts.

Their effect would be so devastating, he claimed, 10,000 aeroplanes flying into one of these curtains, would be destroyed to the last machine. He drew a picture of force projecting plants as well as 200 miles along the border. Each would shoot rays 100 miles on either side. The dust beams would travel in straight lines.

What Scotsman Wastes

One Thing He Does Not Save On Is Water

What is the only thing that Scotsmen ever waste? According to Mr. Chorton, president of the Institution of Mechanical Engineers, the answer is water. Figures of water consumption in the British Isles show that Mr. Chorton quoted at a recent Public Works Congress, show that Dundee, in Perthshire, uses, on an average, 130 gallons of water a day per head of population. This is "top score," but Irvine, in Ayrshire, using 91½ gallons, Bridge of Allan, 85½ gallons, and Paisley 81 gallons all get through a great deal more water than London, where the Metropolitan Water Board's figure is just under 39 gallons per head. And there are places in England where only twelve and fifteen gallons are used.

At Creston, B.C., an air-cooled, electrically operated cold storage with a capacity for three carloads has been installed for the Co-operative Fruit Exchange of that town.

Newfoundland supplied the United States with \$900,000 worth of blueberries in the last six years.

Perhaps the greatest personal tragedy in life is to be able to do a thing pretty well but not very well.

Personal and Local

Mary Klish was a Calgary visitor last week attending the Stampede.

Mr. and Mrs. Albert F. Short were Calgary visitors this week.

See Coleman Hardware Co.'s special display of Aluminum ware in window, and advt. in this issue.

Mr. and Mrs. W. Fraser and son William left this morning for the Lethbridge Fair.

Mrs. Frank Creegan, Sheila and Stanley are spending a holiday at McBain's lake.

Mr. and Mrs. W. L. Borrows and Mr. and Mrs. George Derbyshire are holidaying at Couer D'Alene, Idaho.

Albert Knowles attended the Social Credit meeting at Lethbridge, addressed by Wm. Aberhart of Calgary.

Mr. and Mrs. A. Beck of Star Creek ranch and Mr. and Mrs. Barbour of Bellevue left to day for a motor trip to the coast.

Misses Stephanie Bownick and Mary Kinieki, of Revelstoke, are the guests of Mr. and Mrs. Steve Krzyzw.

Campana's Italian Balm, regular 70c package, for 35c. Try this recommended product.—McBurney's Drug Store

To secure the interest of Coleman people in local events, advertise in The Journal. It is read by the whole family.

A number of people returned on Sunday from Calgary Stampede. An extra bus brought passengers to Coleman during the afternoon.

Mrs. J. A. McLeod and Sidney and Jack left to day to swell the Coleman colony at McBain's lake, where they expect to stay for a week.

Mr. and Mrs. B. M. Hall have left on a motor trip to the coast. Mr. Cooke of Wetaskiwin is relieving in the government store for three weeks.

Lt.-Col. R. F. Barnes, commanding the 18th field brigade, will go into camp at Sarcee on July 20th for the annual training period of the various militia and permanent units.

Joe Spievak and Brick Bell motored to Calgary for the closing night of the Stampede, and were accompanied by Miss Ann Spievak, who remained over at Banff for a few days.

Mr. and Mrs. W. Haysom and party went to Waterton Lakes on Sunday. Mr. John Rushion and party, Mr. and Mrs. J. Atkinson and Mr. and Mrs. Caroe, Mr. Geo. Morgan and Ivor were visitors.

Several from town plan on going to Pincher Creek this evening to hear Wm. Aberhart, B. A., of Calgary, address a mass meeting in the theatre there on the Douglas System of Social Credit. Mayor Pattinson will take a party down.

Joe Pickle, former Coleman resident, now living at Eckville, where he is farming, renews by mail his subscription to The Journal. Nothing like the home town paper for keeping people in touch with local events.

About a dozen wrecked iron freight cars of the open type were noticed being hauled east on flat cars on Tuesday, badly smashed. The smashup occurred on the Kootenay Central between Cranbrook and Golden.

C. D. Griffith, secretary of the Canadian Postmasters Association, and postmaster at Estevan, Sask., made a brief call here last Thursday, calling on the editor of The Journal and Postmaster Graham. He had been attending the convention of the Alberta postmasters at Lethbridge, and visited the Crowe Nest Pass and Waterton Lakes. He was accompanied by Mrs. Griffith and two daughters and Mr. Cumberland of Pincher Creek accompanied him to Coleman.

NOW ...we can offer you LEISHMAN Hand-Tailored Clothes

We are happy to make this announcement as we believe it will be of interest to many men in our community who know and appreciate hand-tailored clothes.

Fine British woollens, hand-tailored, is the foundation of Leishman quality. For many years discriminating men have bought Leishman Clothes on quality alone and their trust has never been misplaced. Every Leishman garment is distinguished by the soft custom ease of exclusive hand-tailoring. Into every important detail—from designing, cutting, button sewing and button-hole making, to collar and sleeve sewing—goes the scrupulous handiwork of the craftsman. That is why Leishman Clothes are so shapely and easy fitting to the last day of service.

Come in and see the new styles, colours, weaves and patterns in suits and topcoats.

Price \$35.00 to \$60.00.
